Sequence 55, Application US/09193043
Patent No. 6251395
GENERAL INFORMATION:
APPLICANT: Gallatin, Michael W.
APPLICANT: WAN der Vieren, Monica
TITLE OF INVENTION: No. 6251395el Human 2
FILE REFERENCE: 27866/35004
CURRENT PILING DATE: 1998-11-16
EARLIER APPLICATION NUMBER: US/09/193,043
CURRENT FILING DATE: 1993-12-23
EARLIER APPLICATION NUMBER: 08/173,497
EARLIER FILING DATE: 1993-12-23
EARLIER FILING DATE: 1993-12-23
EARLIER FILING DATE: 1994-12-21
EARLIER FILING DATE: 1994-12-21
EARLIER APPLICATION NUMBER: 08/962,652
EARLIER APPLICATION NUMBER: 08/962,652
EARLIER FILING DATE: 1994-12-21
EARLIER APPLICATION NUMBER: 08/943,363
EARLIER PILING DATE: 1997-10-03
NUMBER OF SEQ ID NOS: 114
SOPTWARE: PATENTIN Ver. 2.0
SEQ ID NO 55
LENGTH: 1161
TYPE: PAT
ORGANISM: Rattus rattus

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

A; Note: the authors translated the codon TAC for residue 1129 as Thr
A; Note: part of this sequence, including the amino end of the mature protein, was confined the codon.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             A;Cross-references: UNIPROT:P11215; GB:J03925; NID:g187284; PIDN:AAA59544.1; PID:g30714:A;Note: part of this sequence was confirmed by protein sequencing A;Note: part of this sequence was confirmed by protein sequencing A;Note: part of this sequence was confirmed by protein sequencing
